

PC-ISP-FLASH Programmer

PC-ISP-FLASH

Programmer for ISP Flash Microcontrollers

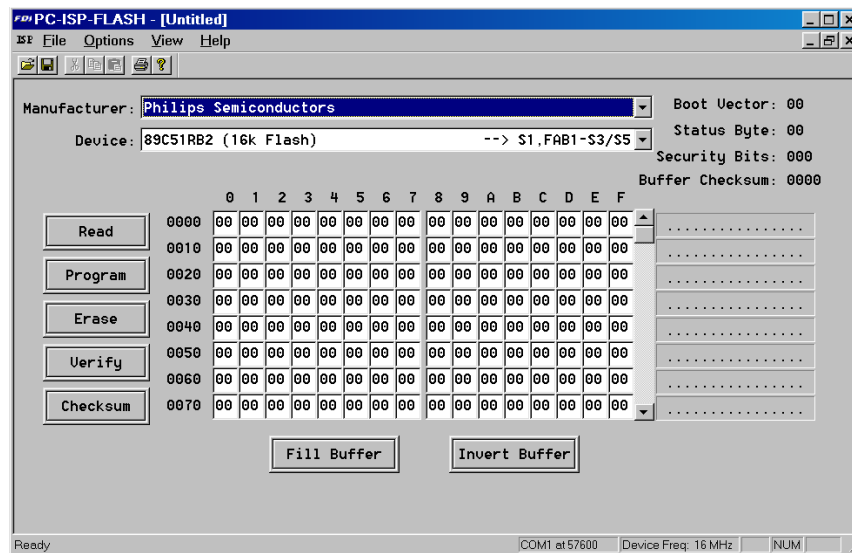

This Windows-based Programmer provides support for the new In System Programmable (ISP) Flash Microcontrollers from Philips Semiconductors, Atmel, SST and Microchip. The PC-ISP-FLASH interfaces directly to the standard RS232 Serial Port on any PC. The PC-ISP-FLASH software runs on Windows 9X, Windows NT4.0 & Windows 2000. Using simple drop-down menus, the software allows the user to select a Flash microcontroller from the list of supported vendors and devices.

Highlights

- Full support for 5V ISP microcontrollers from Philips, Atmel, SST and Microchip
- Program in the 44-pin socket on the PC-ISP-FLASH or other sockets on vendor specific Family Adapter Boards
- Program directly on the user target board with the 15 pin ISP connector
- Complete Kit includes:
 - ◆ PC-ISP-FLASH Adapter
 - ◆ Software
 - ◆ Documentation
 - ◆ Power Supply
 - ◆ ISP Cable
- Less than 10 minutes to
 - ◆ Load the software
 - ◆ Plug in the board
 - ◆ Start programming

Specifications

- Supports 5V ISP Flash microcontrollers from Philips, Atmel, SST and Microchip
- Supports 80C51, XA, AVR and PIC devices with 5V ISP Flash
- Program 44-pin PLCC devices (5V ISP) directly on the PC-ISP-FLASH
- Vendor specific Family Adapter Boards for other standard packages and voltages
- PC-ISP-FLASH interfaces directly to any standard RS232 Serial Port
- Software runs on Windows 9X, Windows NT 4.0, or Windows 2000
- Menus allow easy selection of ISP devices from several vendors
- Complete control over programming, verifying, reading and securing devices
- UL Approved Power Supply included
- RS232 Cable and DB25 Adapter included
- ISP cable (6 pin) included to allow direct connection to the user's target application board
- Supports Intel Hex file formats
- User's Manual, documentation and software included
