

uEZGUI-1788-43WQR Product Change Notification Form

PCN Number: 20140523-01	Rev: 7.2	Date: 05/23/2014
-------------------------	----------	------------------

Summary of Change: uEZGUI-1788-43WQR-BA Functional Test code update with Bootloader demo

Reason for Change: FDI is updating the FCT test code to include the Bootloader demo so that final demo code can be programed from a microSD card in customer Development Kits.

Detailed Description of Change: The uEZGUI-1788-43WQR Dev Kit will now program the uEZ GUI demo code from the microSD card using the Bootloader demo instead of it being JTAG programmed as an extra step in the factory. This will save time in factory test and will also allow the customer to see the Bootloader Demo in use in the uEZGUI Development Kit.
